Watercool HEATKILLER® D5-TOP

\$45.95

Product Images

Short Description

The HEATKILLER® D5-TOP is the perfect add-on for D5 pumps. Four G ¼" threads allow for easy integration into the cooling loop with all common fittings. Non-used threads can be sealed with the included plugs.

Description

The HEATKILLER® D5-TOP is the perfect add-on for D5 pumps. Four G ¼" threads allow for easy integration into the cooling loop with all common fittings. Non-used threads can be sealed with the included plugs.

Hydro-dynamically optimised channels make the pump work more efficient than with the original top.

A stainless steel mounting plate is included. This can be installed with a 90° variation as well, which makes mounting easy even in narrow PC cases. Alternatively, the plate can serve as a supporting base. A decoupling component made from rubber is separately available.

As for material, we use high-quality POM and manufacture the plates from polished stainless steel.

Specifications

- Dimensions block (without pump): 74 x 74 x 42 mm
- Dimensions with base (without pump): 80 x 80 x 65 mm
- Material: POM, polishes stainless steel
- Weight: 350g
- Threads: 4 x G1/4"

Compatible with:

- Watercool: WCP D5-PWM, WCP D5
- Alphacool: TPP 644, VPP655, VPP655 PWM
- Aquacomputer: D5, D5 PWM
- EKWB: EK-D5 Vario, EK-D5 PWM
- Koolance: PMP-450, PMP-450S
- Swiftech: MCP655, MCP655-B
- XS-PC: D5 Vario, D5 PWM
- Laing / Xylem / Lowara: D5 pumps

Included:

- 1x HEATKILLER® D5-TOP

Please note: Pump and fittings are not included.

Additional Information

Brand	Watercool
SKU	WC-31010
Weight	1.0000
Color	Clear
Pump Type	Laing D5
Material	Delrin (POM)
