Description

The All In One 2 is a development of the popular akasa control panel. The multi functional panel sits in a 5.25"
PC bay and offers three major function types including:

• Five slot internal memory card reader Conveniently positioned at the front of your PC makes using flash
cards easy. Compatible with all popular memory cards, accepts high capacity cards and absolutely no card
adapters are required.
• Easy access multi connections Featuring eSATA, IEEE1394, HD Audio and 3x USB2.0 ports neatly covered
behind a push open mesh cover ready to use when needed.

• Smart fan and temperature control Constantly monitors temperature in three system zones and enables automatic (temperature driven) or manual control of three fans. The colour LCD screen displays selected fan speed and thermal probe temperature.

The built in adjustable alarm function warns you if any components exceed pre-set temperatures or if a fan is faulty. The multi featured AllInOne2 panel makes the perfect solution for taking control of your PC system and expanding its multimedia functions. It is easy to use and adds class to any system case. The AllInOne2 is available in silver or black.
