Description

Each grill is laser cut to perfection giving the grill a very unique look that you won't find anywhere else. What makes the Carbon BiColor Rad Grillz so unique is the ingenious 2-Layer design. The air flow of the grill was thoroughly researched and several slit sizes were tested until the perfect balance of aesthetics and quietness was achieved.

The bottom layer of the grill is laser cut and then handcrafted to join the two colors together with seamless flow. The top layer is the carbon film finishing touch which is cut slightly smaller on the inside slit openings so you can see the radical colors beneath, creating a one of a kind look that will not be found but from PrimoChill products.

Carbon BiColor Rad Grillz are the next best thing in the water cooling industry. A variety of colors and sizes accommodates any build.

Certain to be copied, but remember that PrimoChill's Carbon BiColor Rad Grillz are Made in the USA, by Americans, and not just ordered from China.
