\$9.99

Product Images

Short Description

This 36" cable for remote LED toggle on/off switch allows you to place an on/off switch between any of your 4-pin Molex devices. This cable comes sleeved in high quality black flexo mesh that is extremely flexible as well as incredibly durable, keeping your cable safe from fan blades or tight bends around sharp case edges.

Description

This 36" cable for remote LED toggle on/off switch allows you to place an on/off switch between any of your 4-pin Molex devices. This cable comes sleeved in high quality black flexo mesh that is extremely flexible as well as incredibly durable, keeping your cable safe from fan blades or tight bends around sharp case edges. ** This is only for fans and lights and NOT to be used to for hard drives, optical drives, etc. **

Stock sleeving is in black for no extra charge. Any other colors can be used by choosing the paid option below.
