Description

PrimoChill Hex 2-Layer Rad Grillz are the latest addition to the rapidly growing PrimoChill product line. TheHex 2-Layer Rad Grillz are all about functionality without sacrificing style. Each grill is laser cut to perfection giving the grill a very unique look that you won't find anywhere else. What makes the Hex 2-Layer Rad Grillz so unique is the ingenious 2-Layer design. The air flow of the grill was thoroughly researched and several hex sizes were tested until the perfect balance of aesthetics and quietness was achieved. The bottom layer hex pattern is carefully laser cut on a 45 degree angle creating a more aggressive look. The top layer is the finishing touch which blocks out the frame of the fan below giving its fluid and one of a kind look. Hex 2-Layer Rad Grillz are the next best thing in the water cooling industry. A variety of colors and sizes accommodates any build. Certain to be copied, but remember that PrimoChill' s Hex 2-Layer Rad Grillz are Made in the USA, by Americans.
