

Alphacool D-RAM Cooler X4 Universal - Acetal Black Nickel

\$57.95

Product Images

Description

With the new D-RAM coolers all desired memory chips can be cooled.

This cooling block is screwed onto the optional cooling modules or existing heatspreader with a hole spacing of 110mm (like the Corsair Dominator).

Due to its black nickel ground and black or transparent cover with lighting capabilities is the RAM cooler adaptable for each individual system . It is (available in/distinguished by) three different sizes: 2, 4 or 6 RAM modules which can be cooled parallel.

Due to its special technology, the RAM cooler can be used in both, high-flow systems as well as in lower flow systems, at the optimal level.

Specifications

- Technical Details:
- Material: Copper (black nickel)
 - Colour: black
 - Connection thread: 2x 1/4"
 - Dimensions (LxWxH): 128 x 45,2 x 11,1mm
