## Description

---

This green illuminated thermometer can measure the temperature at any location inside or outside of the PC. With this thermometer you have the temperature is always in the eye, for example, graphics card, power supply, CPU, hard drive, or simply the case temperature.

## Specifications

---

Technical specifications:

- Dimensions: 47,5x28,5x14mm
- Digital display: green with black lettering
- Connector: Loop-through 4-Pin Molex
- Measuring range: -50 ° C to 70 ° C
- Power supply: via 5V power supply voltage

Scope of supply:

- 1x Thermometer with digital display - Green

Note:

L ° C means: (check the sensor cable from the display =!) No connection

H ° C means: Reversed voltage / short-circuit (= connection of the display cable to the sensor falschrum / at both poles!)

-xx ° C. is, even with incorrect polarity (= cable from the display to the sensor attaching the other way around!)

Note: The temperature is measured with a permanently integrated sheet sensor which can not be replaced.

## Additional Information
