Short Description

Part of the BitFenix Alchemy Premium Modding Series, Alchemy LED Strips are the ideal choice when modding inspiration strikes. These precision manufactured LED Strips come with BitFenix TriBright™ LED Technology for the absolute brightest LED strips available. Alchemy LED Strips come in a multitude of lengths

and colors, enabling you to bring your modding vision to light.

Description

Part of the BitFenix Alchemy Premium Modding Series, Alchemy LED Strips are the ideal choice when modding inspiration strikes. These precision manufactured LED Strips come with BitFenix TriBright™ LED Technology for the absolute brightest LED strips available. Alchemy LED Strips come in a multitude of lengths and colors, enabling you to bring your modding vision to light.

Features

Powerful Magnets

Tiny yet powerful black magnets embedded into the flexible high transparency Polyurethane substrate allow you to attach Alchemy 2.0 magnetic LED strips to any steel part of your case, radiator shrouds, power supply cover and more. They hold your LED strips in place the first time, every time, and they won't come off after a while. Easily re-locate them within your system for optimum lighting, or re-use them in different builds!

TriBright™

TriBright™ LEDs offer far better color tones, glow brighter, last longer, and scatter light more evenly than conventional LED strips, and as a result cast very soft diffused shadows instead of hard shadows cast by narrow angle single LED modules. TriBright™ LEDs offer unmatched bright white light that illuminate all colors without giving your system a blue, yellow or even slight green tint like most cheap no-name LED strips.

NVIDIA GREEN

Based on popular demand we fine tuned the wavelength of our green LED strips to match the neon green used on high-end VGAs, to let you create nice matching overall build showing off your latest and greatest graphics cards.

Purple

Based on popular demand we added a brand new color to our LED strip line-up, PURPLE! Whether you're tired of the same old red green and blue, or you're simply a fan of purple, or maybe want to build a system for your wife or daughter, you can easily give your build a nice and strong purple glow.

Unmatched cable system

To enable the best possible cable routing and management possible, not only the LED strips themselves, but

even the power adapters are daisy chain-able. We increased the length of the power adapter to 50cm for comfortable routing even in massive cases like our Shinobi XL and Colossus, and even the power cable itself has a magnet embedded in its head, so it wont pull down the LED strip.

Specifications

Specifications

Materials	Copper, Polyurethane, PVC		
Colors	Red, Blue, Green, Purple, White		
LED Chip	5050 SMD Tri-LED		
Brightness	60 Lumen (+/-10%)		
Color Rendering Index	80		
Flexible PCB copper layer	1oz		
Protective PCB cover	High clarity Polyurethane		
Magnet Type	Black, sintered NdFeB permanent magnets		
Power cable length	50cm		
Width	10mm - 0.4"		
Thickness	2mm - 0.08"		
LED Strip Length	120mm - 4.75"	300mm - 11.8"	600mm - 23.6"
Number of LED Chips	6	15	30
Number of Magnets	3	6	12

Additional Information

Brand	Bitfenix
SKU	BFA-MAG-60RK30-RP
Weight	0.3000
Lighting Type	Flexible LED Strip
Length	24"
LED Color	Red
Vendor SKU/EAN	4712883212857
