Internet Reviews	SR2 is a popular radiator choice- the Hardware Labs build quality and limited lifetime warranty, the only Black Ice radiator with multiple ports the absence of which can be a deal breaker for some people. The extremely low liquid flow restriction is also on the other end of the spectrum compared to other currently available Black Ice radiators. So if you are a fan of their radiators, they have made sure to have the SR2 offer enough to distinguish itself from the other offerings. It performs well too, especially with fans at low-medium speeds but fares fairly well throughout the board. To Read More Click "HERE"
