Description

Alphacool's Eiszapfen series is future-oriented and characterized by excellent workmanship and high flow.

Ball valves have always been a flow brake, making life difficult for each pump. Then, Alphacool has developed a ball valve represents no obstacle to a diameter of 10mm.

The inside scoop closes absolutely tight, thus preventing further escape of liquid. On both sides all 1/4" connections with a maximum thread length of 6mm can be screwed.

This ball valve is available in two different color versions: Chrome and Deep Black.
