

Monsoon MMRS D5 Motor Mounting Cover - Red

\$15.25

Product Images

Short Description

Precision machined from aluminum, this D5 MOTOR MOUNTING TUBE with machined aluminum Maltese Cross cap is used to secure your D5 pump. It works with either MMRS-TRP or MMRS-SAP (both sold separately). It also works with our Dual Bay D5 reservoirs. If you already use our Dual Bay Reservoir and are adding a tube reservoir to the back of it, you may already have this part and can reuse it.

Description

Monsoon Modular Reservoir System

Monsoon's new Modular Reservoir System allows you to configure exactly the reservoir you need for your build—no more forcing your build to fit around an off the shelf, one-size-fits-all reservoir. All of the components are sold separately allowing you to mix and match different end caps, couplers, tension rods, tube lengths, mounting options, fill and drain ports, pump options, and lighting.

Because the system is FULLY modular and every component is sold separately, you only buy the components you need for the reservoir you actually want for your dream rig. This saves you money now and down the road when you're upgrading your cooling loop or reusing the reservoir in a new build—just add the few components you need for the new build without buying an entirely new reservoir.

Assembly is straight forward and all the components are made of top quality materials with excellent fit and finish. Check out the how-to video links below for an overview of MMRS and videos on using the different components. Unleash your creativity and set your imagination free with MMRS.

M2-MMT-WC-XX

Precision machined from aluminum, this D5 MOTOR MOUNTING TUBE with machined aluminum Maltese Cross cap is used to secure your D5 pump. It works with either MMRS-TRP or MMRS-SAP (both sold separately). It also works with our Dual Bay D5 reservoirs. If you already use our Dual Bay Reservoir and are adding a tube reservoir to the back of it, you may already have this part and can reuse it.

The main mounting tube body features a sexy finned design that draws heat off of your pump motor before it can be transferred to your cooling loop. The back cover features a Maltese Cross and includes internal sound dampening foam.

Be sure to watch our how-to assembly videos below for more information on how and where to use this part in your reservoir build.

Additional Information

Brand	Monsoon
SKU	M2-MMT-WC-RD
Weight	0.5000
Color	Red
Reservoir Accessory Type	Adaptor
