

Monsoon MMRS Dual Bulb CCFL Light for 150mm Tube - Red

\$7.25

Product Images

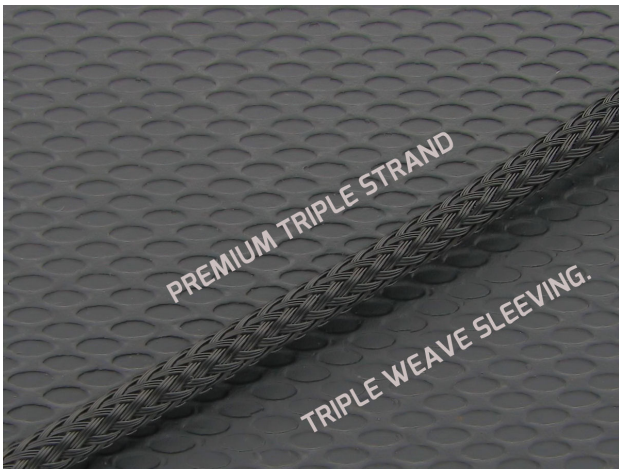

TYPICAL MMRS DUAL BULB CCFL INSTALLATION ON 25MM RESERVOIR MOUNTS.

STANDARD CCFL INVERTER TYPE PLUG.

PREMIUM TRIPLE STRAND
TRIPLE WEAVE SLEEVING.

Short Description

Molded from heavy duty nylon with a black satin finish, this COUPLER allows you to connect two or more sections of tube and provides the ability to add two side facing ports anywhere along the length of your reservoir in 50mm (2") increments based on the tube lengths you opt to use for your reservoir configuration. The mounting holes allow you to mount your reservoir perpendicular, 60 degrees left or 60 degrees right.

Description

Monsoon Modular Reservoir System

Monsoon's new Modular Reservoir System allows you to configure exactly the reservoir you need for your build—no more forcing your build to fit around an off the shelf, one-size-fits-all reservoir. All of the components are sold separately allowing you to mix and match different end caps, couplers, tension rods, tube lengths, mounting options, fill and drain ports, pump options, and lighting.

Because the system is FULLY modular and every component is sold separately, you only buy the components

you need for the reservoir you actually want for your dream rig. This saves you money now and down the road when you're upgrading your cooling loop or reusing the reservoir in a new build—just add the few components you need for the new build without buying an entirely new reservoir.

Assembly is straight forward and all the components are made of top quality materials with excellent fit and finish. Check out the how-to video links below for an overview of MMRS and videos on using the different components. Unleash your creativity and set your imagination free with MMRS.

MMRS-CCFL-XXX-XX

This DUAL bulb CCFL light is designed to work with Monsoon's Modular Reservoir System 25mm and 50mm mounts. Part numbers MMRS-MT-25MM-XX and MMRS-MT-50MM-XX respectively where the XX is a place holder for the mount color. MMRS-MT-25MM-RD is a 25mm tall red mount as an example.

They feature 6 mm diameter colored acrylic lenses over bright white bulbs so you get light that is bright and very color correct—red light that is actually a deep red rather than pink for example. Lights are matched to reservoir tube segment lengths—for example if your reservoir configuration has 100mm and 150mm segments, you will need 100mm and 150mm lights.

The power cable is sleeved in premium triple strand triple weave sleeving, has a black plug, and is approximately 20" or 500mm.

These lights do not come with an inverter—you can find pro class inverters [here](#).

Be sure to watch our how-to assembly videos below for more information on how and where to use this part in your tube reservoir build.

Additional Information

Brand	Monsoon
SKU	MMRS-CCFL-150-RD
Weight	1.0000
Color	Red
Lighting Type	Cathode
Length	15cm
LED Color	Red
