

Monsoon MMR5 300mm CCFL Bulb Two-Pack - Red

\$8.25

Product Images

INCLUDES DRILL BIT AND MOUNTING HARDWARE.

STANDARD CCFL INVERTER TYPE PLUG.

PREMIUM TRIPLE STRAND

TRIPLE WEAVE SLEEVING.

Short Description

These CCFL two packs (two single bulbs) are matched to Monsoon's Modular Reservoir System CCFL lights allowing you to exactly match the lighting on your reservoir to lighting in other locations in your case.

Description

Monsoon Modular Reservoir System

Monsoon's new Modular Reservoir System allows you to configure exactly the reservoir you need for your build—no more forcing your build to fit around an off the shelf, one-size-fits-all reservoir. All of the components are sold separately allowing you to mix and match different end caps, couplers, tension rods, tube lengths, mounting options, fill and drain ports, pump options, and lighting.

Because the system is FULLY modular and every component is sold separately, you only buy the components you need for the reservoir you actually want for your dream rig. This saves you money now and down the road when you're upgrading your cooling loop or reusing the reservoir in a new build—just add the few

components you need for the new build without buying an entirely new reservoir.

Assembly is straight forward and all the components are made of top quality materials with excellent fit and finish. Check out the how-to video links below for an overview of MMRS and videos on using the different components. Unleash your creativity and set your imagination free with MMRS.

ST-CCFL-XXX-2P-XX

These CCFL two packs (two single bulbs) are matched to Monsoon's Modular Reservoir System CCFL lights allowing you to exactly match the lighting on your reservoir to lighting in other locations in your case.

They feature 6 mm diameter colored acrylic lenses over bright white bulbs so you get light that is bright and very color correct—red light that is actually a deep red rather than pink for example. The end mounts are very small, discrete, and use screws—no bulky acrylic cubes, no supposedly self sticking Velcro pads that look bad and fall off every time your case warms up.

They do not include an inverter—no cheesy little blue box inverter with the high pitch whine and wire harness that no serious modder ever uses anyway—you can find pro class inverters here.

Be sure to watch our how-to assembly videos below for more information on how and where to use this part in your reservoir build.

Additional Information

Brand	Monsoon
SKU	ST-CCFL-300-2P-RD
Weight	1.0000
Color	Red
Lighting Type	Cathode
Length	30cm
LED Color	Red
