

Monsoon MMRS Fill Drain Port Base

\$8.95

Product Images

Short Description

Molded from heavy duty nylon with a black satin finish, this END CAP allows you to add an external fill or drain port to your build which greatly simplifies filling and draining water from your loop. Topping off and bleeding air are also much much easier. Includes a reservoir tube O ring seal. This part is designed to work in conjunction with the Fill and Drain Port Cap—part numbers MMRS-FDP-RC-XX (round) or MMRS-FDP-SC-XX (square) or the Fill and Drain Port Spacer Caps—part numbers MMRS-FDP-RCS-XX or MMRS-FDP-SCS-XX. The XX is a place holder for the 2 letter color code—RD for red as an example.

Description

Monsoon Modular Reservoir System

Monsoon's new Modular Reservoir System allows you to configure exactly the reservoir you need for your build—no more forcing your build to fit around an off the shelf, one-size-fits-all reservoir. All of the components are sold separately allowing you to mix and match different end caps, couplers, tension rods, tube lengths, mounting options, fill and drain ports, pump options, and lighting.

Because the system is FULLY modular and every component is sold separately, you only buy the components you need for the reservoir you actually want for your dream rig. This saves you money now and down the road when you're upgrading your cooling loop or reusing the reservoir in a new build—just add the few components you need for the new build without buying an entirely new reservoir.

Assembly is straight forward and all the components are made of top quality materials with excellent fit and finish. Check out the how-to video links below for an overview of MMRS and videos on using the different components. Unleash your creativity and set your imagination free with MMRS.

MMRS-FDP-BASE

Molded from heavy duty nylon with a black satin finish, this END CAP allows you to add an external fill or drain port to your build which greatly simplifies filling and draining water from your loop. Topping off and bleeding air are also much much easier. Includes a reservoir tube O ring seal. This part is designed to work in conjunction with the Fill and Drain Port Cap—part numbers MMRS-FDP-RC-XX (round) or MMRS-FDP-SC-XX (square) or the Fill and Drain Port Spacer Caps—part numbers MMRS-FDP-RCS-XX or MMRS-FDP-SCS-XX. The XX is a place holder for the 2 letter color code—RD for red as an example.

Be sure to watch our how-to assembly videos below for more information on how and where to use this part in your reservoir build.

Additional Information

Brand	Monsoon
SKU	MMRS-FDP-BASE
Weight	0.5000
Color	Black
Reservoir Accessory Type	Tube Cap
