

Mayhems Ultra Pure H2O - 5Ltr

\$22.95

Product Images

Short Description

Our Ultra Pure H2O is the cleanest, most pure water cooling fluid developed specifically with liquid- cooled PCs in mind. Our Ultra Pure H2O has an electrical conductivity mark of less than 0.05 μ S or approx 0.05 PPM at source. The liquid goes through more processes than any other cooling manufacturer on the planet. In addition to this we guarantee that the consumer will not get any better than our Ultra Pure H2O.

Description

Our Ultra Pure H2O is the cleanest, most pure water cooling fluid developed specifically with liquid- cooled PCs in mind. Our Ultra Pure H2O has an electrical conductivity mark of less than 0.05 μ S or approx 0.05 PPM at source. The liquid goes through more processes than any other cooling manufacturer on the planet. In addition to this we guarantee that the consumer will not get any better than our Ultra Pure H2O.

Every drop of our liquid is tested, erstwhile going through the process and if the reading ever goes above 1ppm, then the liquid is rejected and never used. We also use food safe bottles so that there is far less leaking of plastic into the bottle. This gives the end user the knowledge that everything in our power has been done to be able to deliver the perfect liquids for any water cooling loop. There is no other water cooling liquid on the market as pure as Mayhems Ultra Pure H2O.

Features

Advantages of Mayhems Ultra Pure Water:

- Guaranteed High QC controlled liquid
- The best non-conductive liquid for liquid cooled PCs available to the end user
- More than 99.999% impurities removed from the water
- Food Safe Bottles use
- Long storage times if kept in a cool dark environment away from direct sun light @ 20c for up to 2 years
- Electrical conductivity mark of less than 0.05 μ S or approx 0.05 PPM at source
- 1 Litre bottles come with a Child Safety Cap fitted as standard and 5 Litre bottles come in a sealed drum with markers on the side per Litre
- Manufactured and produced totally in the UK
