

# PrimoChill 3/8" ID Rigid Tube Silicon Bending Insert Solid Cord - 1 Foot (for 1/2" OD Tube)

\$2.55

## Product Images

## Short Description

---

The PrimoChill 3/8in OD Rigid Tube Silicone Bending Insert Solid Cord is used for bending the PrimoChill Rigid Tubing (3/8in. ID). This allows the rigid tube to be heated and bent with less likelihood of the rigid tube collapsing, creating little cavities along the surface of the bent rigid tube. This insert cord is solid and is recommended for more complex bends. The solid cord is a little harder to remove vs a tubed version bending insert since it is a solid cord and can not be stretched as much as a tube can.

## Description

---

The PrimoChill 3/8in OD Rigid Tube Silicone Bending Insert Solid Cord is used for bending the PrimoChill Rigid Tubing (3/8in. ID). This allows the rigid tube to be heated and bent with less likelihood of the rigid tube collapsing, creating little cavities along the surface of the bent rigid tube. This insert cord is solid and is recommended for more complex bends. The solid cord is a little harder to remove vs a tubed version bending insert since it is a solid cord and can not be stretched as much as a tube can.

Notes: This Silicone bending insert only works with 3/8" ID tube. Sold by the foot, a quantity of 3 would result in a single 3 foot piece

*Warning/Cautions With the use of different components, materials, fluids, and flow rates, results may vary with the appearance of your tubing. Rigid Acrylic Tube is designed to work with a large variety of cooling components, however the use of alcohols, Ethylene Glycol and as well as any other harmful chemicals is strictly prohibited and will void your warranty. PrimoChill is not responsible for any damage caused by or when using this product. Please use at your own risk.*
