Monsoon MMRS Fully Assembled and Customizable Reservoir - Style 4

\$98.95

Short Description

So you like the new Monsoon Modular Reservoir System (MMRS), but feel overwhelmed by the plethora of options? Pressed for time, impatient, or you're just a 'newbie' to watercooling? Listen, that's all okay. We're here to help.

Description

So you like the new Monsoon Modular Reservoir System (MMRS), but feel overwhelmed by the plethora of options? Pressed for time, impatient, or you're just a 'newbie' to watercooling? Listen, that's all okay. We're here to help.

For a modest fee we can professionally assemble your awesome new killer res *for* you! Simply take the time to research how exactly you want to lay out your loop, come back to this page and choose the type of reservoir that will work with it. We'll do the hard work!

Choice of colors and other options (such as sleeving) are listed below for you to custom-assemble your own, personalized reservoir for that beastly rig!

Monsoon Modular Reservoir System

Monsoon's new Modular Reservoir System allows you to configure exactly the reservoir you need for your build—no more forcing your build to fit around an off the shelf, one-size-fits-all reservoir. All of the components are sold separately allowing you to mix and match different end caps, couplers, tension rods, tube lengths, mounting options, fill and drain ports, pump options, and lighting.

Because the system is FULLY modular and every component is sold separately, you only buy the components you need for the reservoir you actually want for your dream rig. This saves you money now and down the road when you're upgrading your cooling loop or reusing the reservoir in a new build—just add the few components you need for the new build without buying an entirely new reservoir.

Assembly is straight forward and all the components are made of top quality materials with excellent fit and finish. Check out the how-to video links below for an overview of MMRS and videos on using the different components. Unleash your creativity and set your imagination free with MMRS.

CCFL bulbs require an inverter which is NOT INCLUDED. We recommend either our two or four bulb inverters, part number CCFL-INV-2-BA or CCFL-INV-4-BA

Specifications

Parts Used for typical assembly of this model res:

2x MMRS-TR-XXX (chosen in options - length is PER TUBE, *not* total length of reservoir!)

1x MMRS-BH coupler

3x MMRS-MT-25mm (or 50mm)

2x MMRS-TR-XXX (used for ends - must match tube length chosen)

2x MMRS-CCFL-XXX (must match length of res tube chosen)

Additional Information

Brand	Monsoon
SKU	MMRS-STYLE4
Weight	12.0000
Color	Black Chrome
Reservoir Type	Tube Res
Tube Res Length	200mm
Pump Type	Laing D5
