

Thermal Grizzly Spatula for Thermal Paste- 3 Pieces

\$2.99

Product Images

Short Description

Thermal Grizzly from Hamburg is a new German brand that has the fight against high temperatures and poor thermal transport up the cause. The aim is to supply the overclockers scene with powerful thermal compounds, which are still a weak point - the product portfolio can be but just as well for better and quieter cooling of gaming computers, use workstations, small form factor PCs and many other purposes. In addition to higher clock rates allow better cooling and quieter Thermally Conductive a longer life of the components to be cooled.

Description

Thermal Grizzly from Hamburg is a new German brand that has the fight against high temperatures and poor thermal transport up the cause. The aim is to supply the overclockers scene with powerful thermal compounds, which are still a weak point - the product portfolio can be but just as well for better and quieter cooling of gaming computers, use workstations, small form factor PCs and many other purposes. In addition to higher clock rates allow better cooling and quieter Thermally Conductive a longer life of the components to be cooled.

To achieve these goals, Thermal Grizzly has worked in product development closely related to the famous Extreme overclockers novel "der8auer" and tested, developed chemical compositions and analyzing competitors. Now, the first product lines are completed, which are also the highest standards of the manufacturer and the overclocking community justice.

For optimum conductivity properties of thermal compounds in addition to a powerful paste includes the right application of the same. In most cases, the thermal grease is delivered in small syringes from which always can be applied to paste only a drop. With the practical filling of thermal Grizzly this drop can be distributed easily and efficiently on the entire CPU-head or other heat sink, so that an optimal conductivity is achieved and your hardware can be optimally cooled.

Additional Information

Brand	Thermal Grizzly
SKU	TG-AS-3
Weight	0.2500
Color	Black
TIM Type	Applicator
Vendor SKU/EAN	0753677507265
