

Phobya 4Pin PWM to 4x 4Pin Fan Splitter PCB

\$6.99

Product Images

Description

With this PWM splitter from Phobya it is possible to supply up to 4 PWM fans at the same time with electricity and also transfer the PWM signal of the first fan to all other fans (max. 4). This is especially useful for large radiators.

The splitter is very compact and easy to install into your current system/case.

You can place the splitter anywhere within your case/system through the adhesive tape which is at the back of the splitter. Optionally, you could use two screws to fix it at two outward-standing holes.
