## Short Description

---

COUGAR 700K is a premium mechanical gaming keyboard aimed at serious and professional gamers. Inspired by military “stealth technology”, the design is created from elements of geometric facet; Mechanical key modules are mounted on exposed and bended aluminum structure with premium brushed surface

treatments, this structure provides the user with more efficient typing, not to mention a sturdy and strong structural foundation. The ends are then wrapped in a plastic frame to create a protected feel. Intuitive key and button groupings are neatly integrated into the plastic frame. Thereby drawing and driving attention towards key areas and allowing the gamers to concentrate and focus on their competitive matches. An extra FPS palm rest with magnetic attachment on the palm rest area provides great ergonomic support for WASD keys control.

Thereby drawing and driving attention towards key areas and allowing the gamers to concentrate and focus on their competitive matches. An extra FPS palm rest with magnetic attachment on the palm rest area provides great ergonomic support for WASD keys control.

## Features

---

### CHERRY MX MECHANICAL SWITCHES

No amount of functions or good design can make up for bad keys in a keyboard. For this reason, the COUGAR 700K comes with Cherry MX key switches that last up to 50 million keystrokes and bring you both accuracy and a quality feel with each keystroke.

### ALUMINUM BRUSHED STRUCTURE ALUMINUM BRUSHED STRUCTURE

Both for the sake of design and for improving durability, the mechanical key modules are mounted on exposed and bended aluminum structure with premium brushed surface treatments. Apart from being part of an award-winning design (COMPUTEX d&i awards 2014, iF product design award 2014), this structure makes the keyboard sturdy and durable, and gives you what every keyboard should give you: a strong feel of being in command.

### N-KEY ROLLOVER N-KEY ROLLOVER

N-KEY directly in USB mode: no need for USB to PS/2 adapter. You can simultaneously press any number of keys without having to worry about losing accuracy. In addition, two function buttons allow you to change on command from 6KRO to NK RO and vice versa. Again, you're in command.

### 32-BIT ARM PROCESSOR & ON-BOARD MEMORY 32-BIT ARM PROCESSOR

In charge of everything a 32-bit ARM Processor keeps everything going smoothly, while the on-board memory allows you to store up to 3 full configuration profiles on the keyboard itself. This allows you to preserve your configuration even if you bring your keyboard to another computer.

### 1000 HZ POLLING RATE 1000 HZ POLLING RATE

Your keyboard should wait for you, not the other way around. 1ms response time. Together with the Cherry

MX mechanical key switches' response, the COUGAR 700K's 1000 Hz polling rate provides you with a 1ms response time.

#### 6 PROGRAMMABLE G-KEYS 6 PROGRAMMABLE G-KEYS

6 programmable G keys (5 on the left side of the keyboard and a sixth one to the right of the space bar) allow for quick access to a variety of functions. Fully configurable, all of them make your life easier by enabling you to access the functions you want without interfering with the standard keys of the keyboard. Five keys on the left side of the keyboard, near the WASD keys for quick access without moving your hand, and a key just to the right of the space bar for thumb use. More keys, no extra hand movements.

#### ON-THE-FLY MODE SWITCH KEY ON-THE-FLY MODE SWITCH KEY

The purpose of configuring your keyboard is making everything more convenient, but the shortcuts and quick access keys you might use when surfing the internet are not the same you use when playing a game, and the ones you use for a FPS might not be the same you will be using in a MMORPG. In order to seamlessly switch between configuration profiles, the COUGAR 700K includes three dedicated mode switch keys that will make your life much easier.

#### MULTI-MEDIA KEYS MULTI-MEDIA KEYS

Do you enjoy listening to your own music while playing videogames, but think getting out of the game to start, stop or switch songs is annoying? Do you hate it when a sudden change in volume in a videogame deafens everybody in your home? So do we. The COUGAR 700K has seven convenient keys that will allow you to control your multimedia content without needing to stop whatever you're doing.

#### WINDOWS LOCK KEY WINDOWS LOCK KEY

We all have felt the frustration of accidentally hitting the Windows key and kicking ourselves out of a game, only to find an unpleasant result when we get back in. For this reason, the COUGAR 700K includes a dedicated key that will allow you to activate or deactivate the Windows key at any moment.

#### ON-THE-FLY MACRO RECORDING KEY ON-THE-FLY MACRO RECORDING KEY

Your keyboard is already configured, you are playing and suddenly realize that there is another macro that would come in handy for the game you're currently playing. Getting out of the game to record it? Not with COUGAR 700K. With the dedicated MR key for macro recording, you can record new macros anytime on the fly.

#### INSTANT MODE SWITCH INSTANT MODE SWITCH

We provide lots of keys for configuring shortcuts, macros and anything you might want to configure, but sometimes your games require having several functions in the same keys. No problem with the COUGAR 700K. Thanks to the Instant Mode Switch functionality, you can have up to three functions for the same letters: just by clicking the Instant Mode Switch Key, the keyboard will automatically switch to the mode associated to that key, and go back to the previous one as soon as you release it. Many users are already using this, among other genres, on MMORPGs, where spellcaster characters can seamlessly switch temporarily to their protective/healing spell shortcuts by pressing the Instant Mode Switch key and then go back to the standard configuration, which tends to be fully loaded with offensive spells, as soon as they release it. Compatible Cougar Mouses also have this feature, which will allow you to change both your keyboard and mouse mode (hotkeys, macros, etc) by clicking a mouse button and vice versa.

#### REPEAT RATE 1X/2X/4X/8X REPEAT RATE 1X/2X/4X/8X

The COUGAR 700K allows for quick adjustment of the repeat rate of the keyboard, especially useful for games which require pressing repeatedly a specific key.

#### USB PASS-THROUGH & AUDIO IN-OUT USB PASS-THROUGH & AUDIO IN-OUT

No more crawling under the table to change microphone or to connect those new headphones. An USB port and Audio In-Out on the keyboard will allows you to connect your mouse (or any other USB device), headphones and microphone directly to the keyboard.

#### INDIVIDUAL KEY BACKLIGHT SETTING INDIVIDUAL KEY BACKLIGHT SETTING

You can individually configure the backlight of all the keys, making sure the key backlight works exactly the way you need to. As for the brightness of the backlight, there are five levels for you to choose from. This function is very often used for the WASD keys, as well as for any relevant shortcuts you might want to keep always on sight.

#### FPS PALM REST FPS PALM REST

Protect yourself from injuries, gain comfort and improve your performance. Especially designed for FPS (but useful as well for other game genres) this detachable rubber palm support provides a strong grip and just the right height to effortlessly keep your hand in place during action, in the right position to access both the WASD keys and the 6 G-Keys with your shortcuts.

#### ANTI-SLIP RUBBER FOOT ANTI-SLIP RUBBER FOOT

The premium quality rubber foot of the COUGAR 700K will leave your keyboard safely anchored to the table even during intense game sessions.

#### BRAIDED CABLE AND GOLDEN-PLATED CONNECTORS BRAIDED & GOLD-PLATED

To provide enhanced durability and the best possible connection, the COUGAR 700K includes a premium quality braided cable as well as golden-plated connectors for the keyboard, another USB device and audio in/out.
