

WATERCOOL

# Watercool HEATKILLER® NSB Rev3.0 LT

\$37.50

## Product Images

## Short Description

The HEATKILLER® NSB Rev3.0 LT combines cooling power with maximum flexibility. This chipset cooler has been constructed to fit almost any mainboard. The mounting plate can be turned, to allow mounting in any desired orientation – no matter how the mounting holes are placed. Two different mounting plates are included, which cover almost any possible mounting hole spacing from 43.0 mm to 79.2 mm.

## Description

---

The HEATKILLER® NSB Rev3.0 LT combines cooling power with maximum flexibility. This chipset cooler has been constructed to fit almost any mainboard. The mounting plate can be turned, to allow mounting in any desired orientation – no matter how the mounting holes are placed. Two different mounting plates are included, which cover almost any possible mounting hole spacing from 43.0 mm to 79.2 mm.

The bottom is manufactured from pure copper and utilises a highly efficient cooling structure. The flow resistance of the cooler is exceedingly small.

The top is from high quality POM, and features an ornament made from stainless steel just like the mounting plate. Despite the small dimensions (39 x 39 mm), the threads (G1/4") are a full 22 mm apart.

The HEATKILLER® NSB Rev3.0 LT can be mounted on northbridges and on southbridges.

## Specifications

---

Material: Electrolytic copper, POM (black), stainless steel

Dimensions (L x W x H): 39 x 39 x 17 mm (block)

Weight: approx. 50 g

Pressure tested: 5 bar

Threads: G ¼"(DIN ISO 228-1)

Thread spacing: 22.0 mm

Included:

1x HEATKILLER® NSB Rev3.0 LT

1x Mounting plate (43.0 to 59.0 mm)

1x Mounting plate (59.5 to 79.2 mm)

1x Installation material/manual

## Additional Information

---

Brand	Watercool
SKU	WC-10206
Weight	1.2500
Color	Black
Block CPU Type	Intel/AMD
Block Style	Copper-Acetal
