

Alphacool HT 12mm HardTube compression fitting 90° L-connector for plexi- brass tubes - deep black

\$9.75

Product Images

Description

With the new screw-on from Alphacool Plexi for brass borosilicate or carbon tubes Alphacool takes another step towards perfection and quality .

The first two colors , Chrome and Deep Black offer great variety . The product matching series makes every system shine in its own glory and individuality knows no bounds in combination with Alphacool Plexi brass

tubes !

With a new process during chromating the surface finish is connected to the brass body . The longevity of the intense colors and peeling of the chromium layer is inhibited . A Alphacools lettering on the terminals raises the individuality of these items again .

The function of this connector:

This port is used by two 12mm perspex brass borosilicate or carbon tubes to connect to a 90 ° angle .

Features

Model: 90° Angle Adapter

This 90° angle adapter has a ¼" external screw thread on one side and a ¼" internal thread on the other side. Its special feature is that both screw threads are rotatable, allowing for maximum flexibility!

Specifications
