

Monsoon MMRS Vertical Mount - Chrome

\$13.95

Product Images

Short Description

The vertical mount uses a powder coated 3mm thick steel base to flip the mounting angle 90 degrees and comes with a 12mm machined aluminum mounting “arm” that allows you to mount your reservoir perpendicular, 60 degrees left, or 60 degrees right. It features a trio of color matched load spreader bars to help minimize point loading on your case panel. Color matched stainless fasteners are socket head cap screws and include a hex wrench.

Description

Monsoon Modular Reservoir System

Monsoon's new Modular Reservoir System allows you to configure exactly the reservoir you need for your

build—no more forcing your build to fit around an off the shelf, one-size-fits-all reservoir. All of the components are sold separately allowing you to mix and match different end caps, couplers, tension rods, tube lengths, mounting options, fill and drain ports, pump options, and lighting.

Because the system is FULLY modular and every component is sold separately, you only buy the components you need for the reservoir you actually want for your dream rig. This saves you money now and down the road when you're upgrading your cooling loop or reusing the reservoir in a new build—just add the few components you need for the new build without buying an entirely new reservoir.

Assembly is straight forward and all the components are made of top quality materials with excellent fit and finish. Check out the how-to video links below for an overview of MMRS and videos on using the different components. Unleash your creativity and set your imagination free with MMRS.

The vertical mount uses a powder coated 3mm thick steel base to flip the mounting angle 90 degrees and comes with a 12mm machined aluminum mounting “arm” that allows you to mount your reservoir perpendicular, 60 degrees left, or 60 degrees right. It features a trio of color matched load spreader bars to help minimize point loading on your case panel. Color matched stainless fasteners are socket head cap screws and include a hex wrench.

If longer mounting arms are needed our 25mm and 50mm arms will also fit.

The aluminum mounting arm and load spreaders are color matched to all 10 Monsoon color finishes used on our full line of Free Center, Carbon, and Chain Gun compression fittings for hard and soft tube, as well as our full line of Rotaries, Light Port Rotaries, specialty plugs, etc.

Specifications

INCLUDED:

- Black powder coated steel base with two load spreader bars.
- 12mm aluminum mounting arm with load spreader bar.
- All mounting screws.
- Mounting template.

Additional Information

Brand	Monsoon
SKU	MMRS-MT-VRT-CH
Weight	0.3000
Color	Chrome
Reservoir Accessory Type	Mounting
