Short Description

The MasterCase heralds a new case family that offers you unparalleled control. Drawing inspiration from the MasterConcept, this is a case that goes back to our roots, picks up the Cooler Master flag, and charges boldly over the horizon into a new dawn for case technology.

Description

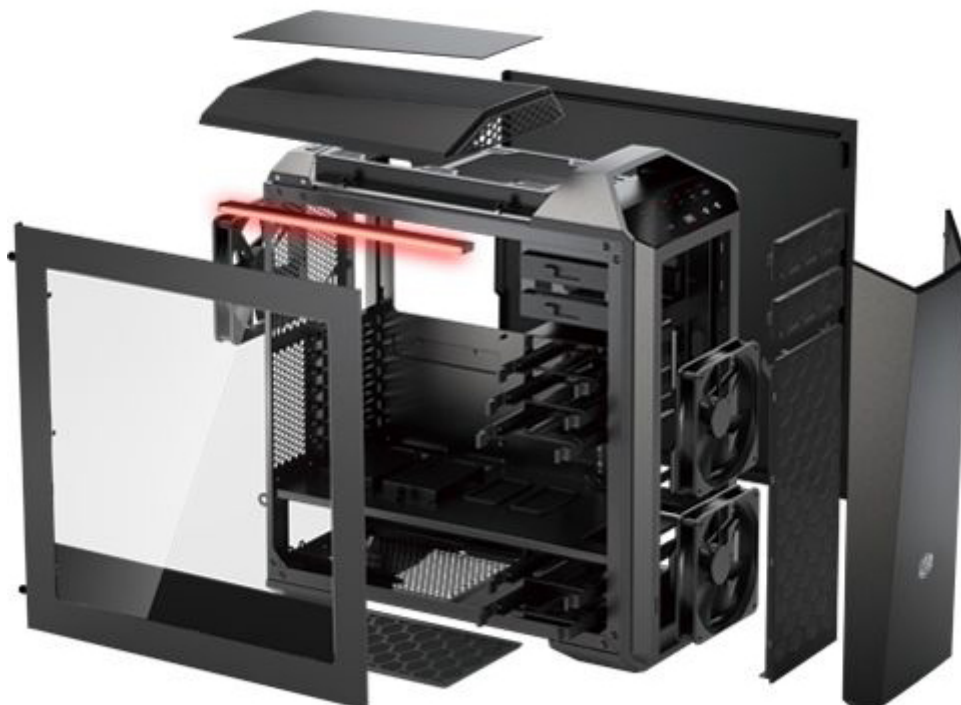

Make It Yours.

**Make of It
What You Will**
MASTERCASE MAKER 5

The MasterCase heralds a new case family that offers you unparalleled control. Drawing inspiration from the MasterConcept, this is a case that goes back to our roots, picks up the Cooler Master flag, and charges boldly over the horizon into a new dawn for case technology. Advancing beyond the concept of a standard build, the MasterCase Maker 5 offers the option to completely swap out and readjust the case's form and functionality with multiple interior and exterior outlooks and customized accessories.

FreeForm™ Modular System

At heart, the MasterCase 5 advocates a new relationship that binds component makers and users closer together. Its elegantly smooth, flexible FreeForm™ Modular System supports multiple outlooks, allowing you to upgrade rather than entirely replace your case as your needs change over time. Each choice changes the look and feel of the case, but also the flexibility of the interior layout, allowing for multiple system configurations like home servers, professional workstations, or even advanced gaming rigs with extra-long dual-slot graphics cards. All this is backed up by an online and in-store support network that puts customizable accessories and additional components right at your fingertips.

Features

UPGRADED I/O PANEL

Buttons for LED strip, fan speed control, and four USB ports, including 3.0 Type C, ensures your rig will be future proof and support the devices of tomorrow.

LED & FAN CONTROLLER BOARD

The controller board supports up to six fans and four LED strips, allowing for high (12V) and low (7V) fan speeds and LED lighting for strips or fans with three modes (on, off, and breathing)

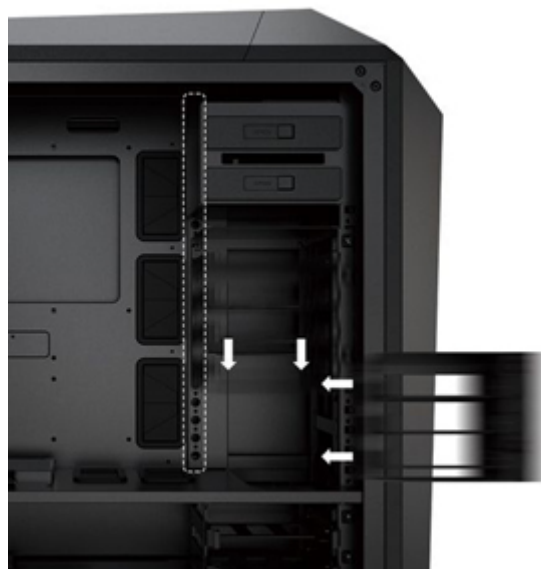

SOUND SUPPRESSION

Included optional top panel with magnetic plate and padded front cover balance noise and airflow.

STEEL ACCESSORY BOX

A steel accessory box with magnetic grip easily sticks to any metallic surface, helping to keep track of tools and screws by securing in place when building your PC.

CLIP-AND-CLICK PANEL

But this isn't just about aesthetics. Each decision opens new possibilities. Leveraging our unique clip-and-click panel, FreeForm™ lets users vertically adjust or entirely remove your optical disk drive (ODD) and HDD via sliding locks so intuitive you'll play with your configurations just for fun.

RED LED STRIP

Light up your case and create accent lighting to your rig with a red LED strip. The magnetic strip lets you place it anywhere you want, while the I/O panel lets you control the lighting mode with three settings (on, off, breathing).
