Short Description

Thermaltake presents the latest Tt Premium product line which follows the core values of Excellent Quality, Unique Design, Diverse Combinations and Boundless Creativity. Under this product line is the new Core W Series - Core W200 and Core WP200 super tower chassis with the Core P200 pedestal chassis - to deliver versatility in different superior looks.

Description

Thermaltake presents the latest Tt Premium product line which follows the core values of Excellent Quality, Unique Design, Diverse Combinations and Boundless Creativity. Under this product line is the new Core W Series - Core W200 and Core WP200 super tower chassis with the Core P200 pedestal chassis - to deliver versatility in different superior looks.

Extend your cooling expectations with the Thermaltake Core P200 Pedestal. Designed for the Core W200 chassis, the P200 adds more expandability to users who is looking for additional cooling and power performance. Separate or super charge your system configurations with an optional PSU mount. Gain more cooling performance with fan/radiator brackets that offer the support for 8 x 120mm or 8 x 140mm solutions or isolate and free up the main chassis space with the storage rack support. Dive into a new world of possibilities with the Core P200 Pedestal from Thermaltake.

TT Premium

To continue achieving the corporate mission of delivering the perfect user experience, Thermaltake developed "TT Premium" with the essence of combining supreme quality products with a new logo design. TT Premium is far more than just a guarantee of quality. Behind the name, it represents the passion in DIY, Modding and Thermaltake's desire to be the most innovative brand in the PC hardware market. To satisfy the demand of the high-end PC users, TT Premium follows its core values of Excellent Quality, Unique Design, Diverse Combinations and Boundless Creativity to provide a high performance PC product for every enthusiast.

Tt LCS Certified is a Thermaltake exclusive certification applied to only products that pass the design and hardcore enthusiasts standards that a true LCS chassis should be held to. The Tt LCS certification was created so that we at Thermaltake can designate to all power users which chassis have been tested to be best compatible with extreme liquid cooling configurations to ensure you get the best performance from the best features and fitment.

DMD - Dismantlable Modular Design

The Core W Series is a great new challenge for makers to start from zero by putting every piece together to complete a high-end system. Take advantage to include high-end, maximum capacity, cooling allotment without the reduction of GPU length limitations when incorporating liquid cooling expansion for the ultimate

in cooling performance.

Flexible Installation for HDD Tray

With freely interchangeable SSD/HDD cage sections, the Core P200 offers more for maximum interior space.

Versatile Expandability

With its stacking design, the Core W200 and the Core P200 make two different combinations: by stacking Core P200 on the top or at the bottom of Core W200. The mix and match of Core WP200 offers an expandable system allowing enthusiasts to incorporate externally-modular upgrades. Designed for high-end gaming system, the chassis opens up space to expand the liquid cooling system, the storage solutions, or even mount a second PSU, thereby enabling a dedicated top/bottom set-up for pure cooling. When stacked, the maximum radiator length supported is 600mm on the front side.
