Short Description

Pimp up your rig with CableMod ModFlex™ Extensions. Each extension uses high-grade copper wiring for maximum conductivity, and sleeved with our signature ModFlex sleeving for excellent flexibility and vivid color. Our cable craftsmen have even minimized or eliminated the use of unsightly heatshrink, ensuring clean

look for your build.

Description

Pimp up your rig with CableMod ModFlex™ Extensions. Each extension uses high-grade copper wiring for maximum conductivity, and sleeved with our signature ModFlex sleeving for excellent flexibility and vivid color. Our cable craftsmen have even minimized or eliminated the use of unsightly heatshrink, ensuring clean look for your build.

The added cable length provided by these extensions makes them a great choice for larger builds where standard length cables won't reach. Best of all, CableMod ModFlex Extensions are available in a wide variety of cable types and colors, which makes it easy to add a splash of color to virtually every cable in your system.
