Short Description

Bring a new level of aesthetic finish to your build. The 2016 FrozenQ Limited Edition Reservoir is here! This reservoir features a tall, rectangular CNC machined body made from performance grade acetal (POM) sealed with a 9mm cast acrylic faceplate.

Description

Bring a new level of aesthetic finish to your build. The 2016 FrozenQ Limited Edition Reservoir is here! This reservoir features a tall, rectangular CNC machined body made from performance grade acetal (POM) sealed with a 9mm cast acrylic faceplate. The reservoir is then adorned with a custom matte black acrylic wrap with colored acrylic inlays to create a unique look among the many reservoir options out there. The front panel of the reservoir has a clear cutout so you can see through to the center of the reservoir. Use pastel or solid colored fluid for a unique look on the front, or put some LED strip plugs in the bottom to light it up from the inside! The LE-2106 is super easy to mount, and comes with 4 6-32 threaded inserts on the rear of the reservoir, so you can mount it in the same way you would clips for a cylinder reservoir.
