Short Description

Masterkleer is the first manufacturer to globally offer a BPA (plasticiser) free hose that is RoHS compliant and absolutely crystal clear. Before now, no manufacturer has been able to put a plasticiser-free and absolutely clear hose that is also truly RoHS compliant onto the market.

Description

Masterkleer, a name in the water cooling business that can no longer be ignored!

Masterkleer is the first manufacturer to globally offer a BPA (plasticiser) free hose that is RoHS compliant and absolutely crystal clear. Before now, no manufacturer has been able to put a plasticiser-free and absolutely clear hose that is also truly RoHS compliant onto the market.

Manufactured from highly flexible PVC, these hoses fit all areas in your water cooling system perfectly, whether it's for longer stretches to an external cooler or in a mini case with very little space. These hoses can even be installed in a server in continuous operation. Masterkleer's manufacturer's years of experience in "computer water cooling" gives this product definite advantages, such as maximum security through consistent hose strength, an excellent balance between flexibility and bend strength, extremely long lifespan and no colour bleeding to the cooling fluid whatsoever.

Tubing is sold by the foot
