

WATERCOOL

# Watercool HEATKILLER® Tube - struts 150mm - raw aluminum

\$14.50

## Product Images

## Short Description

---

Our colored interchangeable struts are a easy way to customize your HEATKILLER® Tube Series reservoir. The struts are made from solid aluminum. The colored versions have a high end anodically oxidized finish. Delivery includes four struts. One of them is designed to hold a LED strip. Corresponding LED strips are available separately.

## Description

---

Our colored interchangeable struts are a easy way to customize your HEATKILLER® Tube Series reservoir. The struts are made from solid aluminum. The colored versions have a high end anodically oxidized finish. Delivery includes four struts. One of them is designed to hold a LED strip. Corresponding LED strips are available separately.

Please be careful to choose the correct strut length for your tube. The name of your HEATKILLER® Tube Series tells you its length, for example a HEATKILLER® Tube 100 requires 100mm long struts.

## Specifications

---
