Hardware Labs Black Ice® Nemesis® GTR Satin White Radiator - 560mm

\$218.50

Product Images

Short Description

We REV IT UP! The Black Ice® NEMESIS® GTR™ 560 takes performance to the red line and back with its new 4th generation core geometry. The GTR is optimized for high speed fans with large CFM's where noise is not of concern but ultimate performance is.

Description

ABSOLUTE PERFORMANCE

We REV IT UP! The Black Ice® NEMESIS® GTR™ 560 takes performance to the red line and back with its new 4th generation core geometry. The GTR is optimized for high speed fans with large CFM's where noise is not of concern but ultimate performance is. These scalable radiators will offer the highest performance available and let you choose how powerful a fan you wish to use. If you want to push the cooling limit using the highest performance radiator in the market....choose the Black Ice® NEMESIS® GTR™ !

Features

ULTRA PERFORMANCE

- Increased internal coolant flow rates
- 15% more tubing area in the same Black Ice® NEMESIS® 560GTX® radiator
- Single 140mm fan Xtreme form factor dual-core radiator

EASE OF USE

- Standard G 1/4" inlet/outlet fittings
- Standard M4 mounting threads
- Compatible with Black Ice® Xtreme, Black Ice® GTX®, NEMESIS® GTX® radiators

SUPERCruise™ Optimizations

- Noise optimized for 1000 RPM fans
- New Enhanced Supercruise™ optimizations for scalable performance for higher RPM fans.

16 FPI 4th GENERATION GT CORE

- 16 FPI 25 Micron 4th Generation Radical Geometry Copper Fins
- 15% more tubing area in the same Black Ice® NEMESIS® 560GTX® form factor

INDUSTRY STANDARD QUALITY

- Industry standard Black Ice® quality
- Custom Satin White high quality finish
- Lifetime warranty against manufacturing defects*

RoHS COMPLIANT

- Fully ROHS Compliant
- Made using water soluble flux
- 100% sourced from conflict-free materials

Specifications

Brand	Hardware Labs
SKU	N560GTR-F2PW
Weight	8.0000
Color	White
Radiator Size	560 (4 x 140mm)
Radiator Thickness	44mm

Hardware Labs had a gap in their inventory till now. They had radiators for low airflow performance, radiators for low liquid restriction and they were missing radiators for high airflow performance. Enter then the Nemesis GTR. I can already see some HWBot benchers getting interested in this where absolute performance trumps everything. If you can spare the coin needed and want the best possible performance at good overall quality, all I have to say is.. Rev it up!
