

PPCS LCD US Plug Socket Energy Meter Electricity Watt Voltage Amps Usage Frequency Monitor Analyzer Power Manage

\$22.95

Product Images

Short Description

Now you can reduce your energy costs with this Power meter. Simply plug it into a wall socket and then plug in your appliance to assess how efficient they really are. This device will measure energy and cost of the household appliances, and help users reduce the power bill and carbon emissions. These Power meters are perfect for measuring miners wattage for all you cryptocurrency miners!

Description

Now you can reduce your energy costs with this Power meter. Simply plug it into a wall socket and then plug in your appliance to assess how efficient they really are. This device will measure energy and cost of the household appliances, and help users reduce the power bill and carbon emissions. These Power meters are perfect for measuring miners wattage for all you cryptocurrency miners!

Features

- Measures various parameters: power(W), energy (kWh), volts, amps, hertz, power factor and maximum power (W), time, days
- Large LCD counts consumption by Kilowatt Hour
- Connects to household appliance & assesses its efficiency
- Cumulative Kilowatt-Hour monitor
- Calculates electricity expenses
- Built-in Battery(3.6V rechargeable batteries) backup, allowing meter to store the total electricity and memory setting
- Press the RESET button if an abnormal display appears or the buttons fail to response.

Specifications

For US PLUG:

Voltage: 125Vac/60Hz

Max Current:15A

Max Power:1875W

Time Display Range: 0.000-9999 days

Power Range: 0.0-9999W

Voltage Range: 0.000-9999V

Frequency Range: 0.000-9999Hz

Current Range:0.000-9999A

Power Factor: 0.000-1.000

Overload Alarm Setting Watts Range: 0.000-9999W

Volume Range of CO2: 0.000-9999kg (1KWH changes into 0.998kg CO2)

Additional Information

Brand	PPCS
SKU	PPCS-BA3091
Weight	0.7500
Color	White
Tool Type	Electrical
