\$74.99

## Product Images

## Short Description

---

The NT06-PRO is a completely redesigned cooler based on the [NT06-E](#). It has optimized heatsink fins soldered onto six 6mm thick copper heat pipes to provide more contact to produce higher efficiency rate of heat dissipation. A new, compact 120mm PWM fan with excellent balance of airflow and noise is included to provide forced-air heat dissipation with the ability to cool components around the CPU area. For users requiring high performance cooling with specific space requirements, the NT06-PRO is the best choice.
