

Corsair Dual SSD Mounting Bracket

\$8.99

Product Images

Short Description

The Corsair Dual SSD Mounting Bracket solves the problem of upgrading desktop PCs which only have 3.5" hard drive bays. Installation is straightforward: place one or two SSDs into the bracket with the screws provided, and then attach the bracket to any standard 3.5" drive bay. The black anodized aluminum looks great in any case, and it's designed to allow extra clearance for connecting SATA data cables without straining the connectors.
