Features

Trusted SecuFirm2™ quality

Over the years, SecuFirm2™ has become synonymous with impeccable long-term stability and flawless craftsmanship. Enthusiast users and industry clients alike trust the time-tested quality of Noctua's professional mounting systems.

Perfect contact pressure

SecuFirm2™ mounting systems use high-grade coil springs to achieve perfect contact pressure. No guesswork regarding how far to tighten the mounting screws, no risk of damaging the socket with excessive pressure!

Integrated fastening brackets

Noctua's SecuFirm2™ systems feature fully integrated fastening brackets with pre-fixed pressure screws and springs, which greatly facilitates the installation process. No fiddling with loose screws and springs!

Tailor-made for AM4

In order to cut costs, many manufacturers use cross-platform parts for both Intel and AMD, which can cause compatibility issues. Noctua's SecuFirm2™ mounting system for AM4 has been tailor-made for this socket in order to ensure optimal compatibility.

Cooler can be installed turned by 90°

Coming with two different sets of mounting bars, the SecuFirm2™ system allows the users to choose the orientation of the cooler according to their preferences in order to ensure best compatibility and optimal alignment with the airflow path inside the case.
