

EK-Cable Pump testing adapter

\$3.99

Product Images

Short Description

EK-Cable Pump testing adapter is a simple adapter cable for connecting any liquid cooling pump (with 4-pin fan header) or computer cooling fan with SATA power cable. This adapter is recommended to be used only

for testing purposes while leak-testing your loop and is intended to be connected directly to PSU, without the need for powering up the entire system. The cable is approximately 15cm long.

Description

EK-Cable Pump testing adapter is a simple adapter cable for connecting any liquid cooling pump (with 4-pin fan header) or computer cooling fan with SATA power cable. This adapter is recommended to be used only for testing purposes while leak-testing your loop and is intended to be connected directly to PSU, without the need for powering up the entire system. The cable is approximately 15cm long.

Specifications

- 3-pin fan header to SATA power adapter
- RoHS compliant

Made in China for EKWB!

PLEASE NOTE:

- This adapter does not provide any tacho or PWM signal and is recommended to be used only for testing purposes. While connected with this cable, every liquid cooling pump or fan with PWM feature, will run at 100% speed.
