Short Description

The HardTube project has become a reality. Alphacool is breaking new ground and setting a new standard!

Up till now, the most commonly used method for connecting water cooling systems was normal PVC tubing - but now, Alphacool is offering another way to set up your system. HardTubes provide more organisation for a system, giving it a distinctly more structured appearance.

Description

The HardTube project has become a reality. Alphacool is breaking new ground and setting a new standard!

Up till now, the most commonly used method for connecting water cooling systems was normal PVC tubing - but now, Alphacool is offering another way to set up your system. HardTubes provide more organisation for a system, giving it a distinctly more structured appearance.

Available now are the brand-new brass tubes, in black chrome and chrome. With the corresponding connectors and their easy functionality, these tubes can be linked or sealed together for an absolutely leak-proof fit. The plexiglass tubes can be fitted into a system easily with the right bending tools, without requiring extra angled pieces. The tubes must be cut to the right length in order to fit into the system.
