Short Description

The RayStorm Neo sTR4 is the biggest and highest performance CPU block XSPC have ever made. Not only does the copper base plate cover the whole of the IHS, but the fins cover all of the Threadripper's dies. The RayStorm Neo sTR4 offers unparalleled cooling for Ryzen Threadripper CPUs.

Description

The RayStorm Neo sTR4 is the biggest and highest performance CPU block XSPC have ever made. Not only does the copper base plate cover the whole of the IHS, but the fins cover all of the Threadripper's dies. The RayStorm Neo sTR4 offers unparalleled cooling for Ryzen Threadripper CPUs.

Each waterblock is carefully machined from pure copper and acrylic, while the hold down bracket is machined from solid aluminium. As with all XSPC products, no aluminium is used in the coolant flow path.

The RayStorm Neo offers outstanding performance, low flow restriction, RGB lighting, and thanks to our new mounting system it's easier than ever to install.

Supplied with a multi function RGB controller and two RGB LEDs.
