

Alphacool GPU RAM Copper Heatsinks 10x10mm - 10pcs

\$11.50

Product Images

Short Description

The small heat sinks are the perfect addition for cooling various electronic components such as the graphics card VRam, the voltage transformer on a motherboard, or even in a power amplifier or in RC vehicles.

To ensure maximum heat capacity and cooling performance, the coolers are made of copper. Alphacool uses a special coating to prevent the infamous greenish discolouration on copper as much as possible. This increases the lifespan of the cooler and ensures steady cooling performance.

Description

The small heat sinks are the perfect addition for cooling various electronic components such as the graphics card VRam, the voltage transformer on a motherboard, or even in a power amplifier or in RC vehicles.

To ensure maximum heat capacity and cooling performance, the coolers are made of copper. Alphacool uses a special coating to prevent the infamous greenish discolouration on copper as much as possible. This increases the lifespan of the cooler and ensures steady cooling performance.

The coolers can be installed onto the desired components with optional thermal paste or self-adhesive thermal pads.

Specifications

Technical Data

- Dimensions: 10 x 10mm
- Material: Fullcopper

Scope of Delivery

- Alphacool GPU RAM Copper Heatsinks 10x10mm - 10pcs

Additional Information

Brand	Alphacool
SKU	AC-17426
Weight	0.3000
Color	Copper
Vga	Universal
Block GPU Type	Nvidia/AMD
Block Accessory Type	Heatsink
Material	Copper
Vendor SKU/EAN	4250197174268
