The top is made of a soft silicone rubber, it protects your smartphones and tablets from scratches and slip-off.

Description

Zentree provides a sophisticated docking surface, 3D Tree Array, which accommodates multiple gadgets of various sizes: iPhones, iPads, androids, tablets, phablets, smartwatches or really any other USB device. The top is made of a soft silicone rubber, it protects your smartphones and tablets from scratches and slip-off.

The Smart IC, a core part of Zentree Charger Unit, auto-negotiates the best charging current for your gadgets and ensures truly safe multi-device charging. It also prevents over-charging after battery's 100% charged. Zentree is compatible to the latest USB charging standards, it provides 4 internal USB ports with current output of 2.4A max per-port and total power of 48W max.

Features

The ZENTREE is designed to work with any USB charged device. It's been fully tested with Apple™ mobile and tablet devices, various Android™ mobile phones and tablets, Pebble™ watches, Bluetooth™ headsets, portable power banks, GPS trackers and even bike lights.

“The ZENTREE features a revolutionary design concept, you can charge any mobile device and dock it in any way you want. Speaking the famous words of Neil Armstrong, ZENTREE is one small step for the market, but one giant leap for multi-device charging”, said Gebhard Scherrer, Sales Director of GELID Solutions Ltd.

The ZENTREE conforms to FCC, CE-LVD, CE-EMC, DOE VI and carries a 2-year warranty.

Specifications

3D Tree Array

- Zentree is specifically designed to accommodate different devices of varying sizes with ease and convenience. Charge your favorite gadgets in any way you like.

Seamless Cabling

- Zentree is stunningly easy to operate. You can dock and start charging your favourite devices just in seconds.

48W Power Output
