Short Description

The In Win Aurora RGB fans provide a better RGB lighting experience, as each led is embedded with a special IC Chip inside. Through this installation, the Aurora fans and the LED strips can present an array of colours

simultaneously, which also creates various RGB lighting effects. With speeds up to 2000 RPM, air flow up to 57.6 CFM and air pressure up to 2.77 mm/H2O in Turbo mode, the Aurora fans offer better cooling performance. Pack of 3 with 2x 30cm RGB LED strips.

Features

RGB LED Lighting Effect

To provide a better RGB lighting experience, each led is embedded with a special IC Chip inside. Through this installation, the Aurora fans and the LED strips can present an array of colors simultaneously, which also creates various RGB lighting effects.

Exclusive Software

Users can use our exclusive software to change the lighting or the frequency. There are endless possibilities since users are now given control of your own fans.

Exclusive Addressable RGB Cable

By using our exclusive addressable RGB cable to connect to a motherboard's addressable header, the PC's LEDs can be synced by the motherboard. Customizing your PC has never been easier!

** The addressable RGB cable can only be used with the motherboard with addressable RGB headers.*

** By using the addressable RGB cable, all the Aurora fan function will be controlled by the motherboard.*

** The addressable RGB cable can only support addressable RGB header, please DO NOT attempt using the cable on other headers.*

Modular Connector Design

The modular connector design allows each fan and LED strip to link with each other, which also provides tidier cable management. By doing this, users will have a totally customizable experience.

Turbo Speed Control

Aurora can speed up the revolutions for better cooling performance. A useful feature when overclocking and pushing PCs to their limits.

(Speed : 2000 RPM / Air Flow : 57.6 CFM / Air Pressure : 2.77 mm/H2O)

Shockproof Rubber Stand

With four shockproof rubber stands on the corners, Aurora eliminates unwanted vibration for a much quieter experience.
