# Black Ice Nemesis 140GTS® XFLOW Ultra Stealth Cross-Flow Low Profile Radiator - Black Carbon

\$43.95

## Product Images

## Short Description

The Black Ice® Nemesis® 140GTS® XFlow steps up to the challenge for high performance for single-fan stealth form factor PC radiators. Featuring the Black Ice® Nemesis® GTS® XFlow core platform, this single 140mm fan radiator is able to provide enhance coolant flow and even better performance under low airflow conditions. This gives PC performance enthusiasts more performance for less noise in the same single-fan form factor. Now featuring a vectored cross-flow tank design, overall system flow rates are enhanced for systems using impingement type waterblocks.

## Description

The Black Ice® Nemesis® 140GTS® XFlow steps up to the challenge for high performance for single-fan stealth form factor PC radiators. Featuring the Black Ice® Nemesis® GTS® XFlow core platform, this single 140mm fan radiator is able to provide enhance coolant flow and even better performance under low airflow conditions. This gives PC performance enthusiasts more performance for less noise in the same single-fan form factor. Now featuring a vectored cross-flow tank design, overall system flow rates are enhanced for systems using impingement type waterblocks.

## Features

- 140 mm x 1 fan slim form factor one-pass radiator
- 186mm x 153mm x 29.6mm (L x W x H)
- 16 FPI 25 Micron Copper Fins
- Now optimized for sub-800 rpm ultra-stealth fans
- Supercruise optimizations for scalable performance with higher speed fans
- 15% more tubing area in the same Black Ice® GTS™ 140 XFLOW form factor
- Increased internal coolant flow rates
- Standard G 1/4" inlet/outlet fittings
- Standard M4 mounting threads
- Custom Black Carbon™ high quality finish
- Fully ROHS Compliant
- 100% Made from conflict-free materials
- Industry standard Black Ice® quality
- Lifetime warranty against manufacturing defects\*

\* Limited warranty information: [www.hardwarelabs.com/nemesis/warranty](http://www.hardwarelabs.com/nemesis/warranty)

\*\* radiator shown with optional push fittings

## Specifications

RecommendedCapacity StealthSupercruise8-Core CPU				GPU SLI/Crossfire	FANS	
120GTS XF	350W	■	■	■	1	1 X 120mm

240GTS XF	750W	■	■	■	DUAL	2 X 120mm

# Additional Information

Brand	Hardware Labs
SKU	N140GTS-F1PB
Weight	3.0000
Color	Black
Radiator Size	140 (1 x 140mm)
Radiator Thickness	30mm
Vendor SKU/EAN	4806518484778

Internet Reviews

October 23, 2014 The Quad Rad Roundup

"Performance should never be the sole metric to base a radiator choice on. In fact, never buy a radiator separately- get the radiator and appropriately chosen fans in terms of airflow, static pressure and noise levels you are comfortable with. "The HWL (Black Ice NEMESIS) rads scale great with airflow while the XSPC RX V3 does not- goes to show that liquid and air flow restrictions don't tell everything and the entire package can affect things. The Nemesis series was optimized for scaling and it has showed to be the case in here." -Varun S. Gangoli. Read the whole review [HERE](#).
