Special Price
$3.95 was
$6.32

Product Images

Short Description

A sensor that simply screws into a G1/4" thread. Comes with cable and 2-pin connection.

Can be attached to any free G1/4" thread opening on a radiator, reservoir, or t-piece integrated into the loop.

Description

A sensor that simply screws into a G1/4" thread. Comes with cable and 2-pin connection.

Can be attached to any free G1/4" thread opening on a radiator, reservoir, or t-piece integrated into the loop.

Fully sealed and absolutely watertight. Fully galvanized - no corrosion issues! Full functionality with any PC temperature indicator compatible with standard PC temperature indicators! Control your PC independent of the BIOS sensors: that's a double safeguard, like the familiar "redundancy" (double security) in the professional sector.

Long (50cm) connector cable, suitable even for a Big Tower!

Specifications

- 1x Alphacool Eiszapfen temperature sensor plug G1/4 - Deep Black

This is a 10 kOhm temperature sensor which is compatible with, among others, the following devices:
