Description

We are estatic to bring you the newly upgrade Luxury Cold Cathode light kit from Performance-PC's

For those that know how to sleeve and have the tools to do this we applaud you! For the many out there that do not have the skills, the tools or the time and want the finest cathode kit they can put in their case...this one is for you! These kits are professionally sleeved in house and take over one hour of labor to complete. So this is not a quick cheap product. We meticulously sleeve the inverter cable harness and both bulbs and complete the kit with your choice of 2-port or 4-port Monsoon CCFL Inverter and then a ModMyToys Premium Vented Black PCI Bracket with LED Rocker Switch to match your cathode color. It all flows and you can be assured it has that professional look to wow your friends and family! Your PSU cables are single braided so why forget your cathode kits? Light up your world in style!

**Note the picture shows various colors and size cathode bulbs but, you can get any color and size for each of the 2 bulbs!

Features

Inverter Features:

- Single Power Monsoon CCFL Inverter (up to 4 inverters tested)
- 2x 300mm Monsoon CCFL Bulbs
- Anodized black aluminum case with finned design
- Built with top quality components for a worry and "whine" free installation
- The inverter has two modes of operation that can be set via a front jumper
- Powers up to four bulbs 300mm in length.

Cathode Bulb Features:

- High brightness
- Perfect color representation
- Long life span
- High reliability
- Easy installation
- Double the average wire length for easier install and positioning
