Short Description

Introducing the new Das Keyboard 4C compact mechanical keyboard. The same Das Keyboard quality you demand with a new compact tenkeyless design. The tactile feel, psycho-acoustic experience and oh-so-sleek design deliver a euphoric typing experience.

Description

Compact Design, Same Incredible Experience

Introducing the new Das Keyboard 4C compact mechanical keyboard. The same Das Keyboard quality you demand with a new compact tenkeyless design. The tactile feel, psycho-acoustic experience and oh-so-sleek design deliver a euphoric typing experience.

Das Keyboard 4C Professional is one of a kind. Not only is the click clack sheer music to your ears, but you'll also have one incredible machine that delivers a faster, more enjoyable typing experience.

It's made of the highest-quality materials and has a robust construction you can feel. All of our keyboards are designed with high-performance, gold-plated mechanical key switches lasting up to 50 million keystrokes.

Features

Das Keyboard uses *best-in-class, mechanical key switches* that provide tactile and audio feedback so accurate it allows you to execute every keystroke with lightning-fast precision. Its *high-performance, gold-plated switches* provide the best contact and typing experience because, unlike other metals, gold doesn't rust, increasing the lifespan of the switch. The Das Keyboard 4C Professional compact mechanical keyboard is available in both the Brown and Blue Switches.

Brown Switch - Tactile Experience

The Brown switches have a *soft, tactile bump* about halfway through the key press. The Soft Pressure Point switch technology makes the mechanical keyboard less clicky while providing an *awesome tactile experience*.

Blue Switch - Clicky

The Blue switches have a *"clicky" tactile bump* when the activation point is hit. This feedback helps to *increase typing speed* by reducing effort needed to push the keys all the way down. The Blue switch is the most "clicky" of the Das Keyboard line.

Sleek Compact Tenkeyless Design

Same great quality packed into a new compact design. You'll be able to claim some of your desk space back without compromising quality. The Das Keyboard 4C features a compact *tenkeyless design* with 87-keys (US); 88-keys (Europe). Need more desk space? Don't use the numpad? We got you covered...

Dedicated Windows Key Disable Control

Instantly deactivate the Windows key by pressing the dedicated Windows key disable control for better gaming. We want to make it even easier for you to destroy your opponents.

N-Key Rollover

Gamers and fast typists will love to hear that Das Keyboard 4C Professional supports *full n-key rollover (NKRO)* via USB. No need to use a PS2 adapter anymore.

Full n-key rollover works with Windows, Linux, Chrome OS, and Mac OS X.

USB 2.0 High-Speed Hub

Das Keyboard 4C Professional has a *two-port USB 2.0 hub* to transfer music, pictures and videos. No need to worry about running out of places to sync your phone.

UV Hard Coat-Protected Key Caps

The Das Keyboard 4C Professional has *UV hard coat-protected key caps to prevent fading*. The UV hard coating, silk screen legends and new printing process allows for extra durable inscriptions. Das Keyboard's key cap font has been designed to provide ease of reading. Das Keyboard's font looks modern while keeping some of its lines from older, well established fonts. The overall result is sleek and easily readable while not drawing unnecessary attention.

Footbar = Ruler

We got tired of those fragile keyboard feet. They are oh so typical. The *magnetically detachable Das Keyboard footbar* raises the keyboard to an optimal 4-degrees. It looks sharp and can be used as a precise ruler when not in use as a footbar. The 13 inch ruler is scaled on both sides. A ruler? Why not...

Extra Long Cable

Das Keyboard 4C sports a *2-meter (6.5ft) cable* that goes through desk grommets to keep your workspace neat and tidy. Now equipped with *only one USB cable* to power the keyboard and USB hub at the same time.

Media and Special Function Keys

Quick access media and special function keys for mute, volume control, play/pause, next track and previous track. Not to mention, a quick access *sleep key to save energy*. Not only will you save energy, but by putting your computer to sleep, you'll save time and be up and running much faster than if you shut down and restart.

Every Detail Matters

Featuring a stunning look and compact design, the Das Keyboard 4C Professional has a *sleek anodized aluminium top panel*, a resonance-free bottom enclosure, a magnetically attached footbar, and a laser-engraved aluminium bottom label... all which make the design feel more bad ass and the typing feel more responsive. *There is no detail too tiny for us.*
