$11.68 was
$29.99

Product Images

Short Description

The LED revolution continues with CableMod WideBeam™ Hybrid RGB/W LED Strips. By combining both RGB and white LEDs on a single strip, WideBeam Hybrid RGB/W LED Strips deliver the flexibility of RGB with dedicated white LEDs.

Description

The LED revolution continues with CableMod WideBeam™ Hybrid RGB/W LED Strips. By combining both RGB and white LEDs on a single strip, WideBeam Hybrid RGB/W LED Strips deliver the flexibility of RGB with dedicated white LEDs.

Compared to other RGBW solutions on the market that utilize combination RGBW LED bulbs, CableMod WideBeam Hybrid RGB/W LED Strips offer brighter, truer whites, making them a superior lighting solution. What's more, these LED strips are compatible with GIGABYTE® RGB Fusion Technology, so you can sync up your system's color scheme right out of the box.

To adhere to a wide range of surfaces, CableMod WideBeam Hybrid LED Strips also come with two different adhesives. Strong rare-earth magnets embedded underneath the waterproof coating allow these strips to adhere effortlessly to magnetic surfaces like steel PC cases, and for cases that are non-magnetic, a super-strong 3M adhesive is also included.

NOTE: This product requires a CableMod WideBeam LED Kit or GIGABYTE® motherboard with compatible RGB Fusion header to work.

Specifications

Here's what you get inside the package:

- 1 x WideBeam Hybrid LED Strip
- 1 x 5-pin Extension Cable (5cm)
- 4 x 5-pin Connectors
