Short Description

The LED revolution continues with CableMod WideBeam™ Hybrid RGB/W LED Strips. By combining both RGB and white LEDs on a single strip, WideBeam Hybrid RGB/W LED Strips deliver the flexibility of RGB with dedicated white LEDs. Compared to other RGBW solutions on the market that utilize combination RGBW LED bulbs, CableMod WideBeam Hybrid RGB/W LED Strips offer brighter, truer whites, making them a superior lighting solution.

Description

The LED revolution continues with CableMod WideBeam™ Hybrid RGB/W LED Strips. By combining both RGB and white LEDs on a single strip, WideBeam Hybrid RGB/W LED Strips deliver the flexibility of RGB with dedicated white LEDs. Compared to other RGBW solutions on the market that utilize combination RGBW LED bulbs, CableMod WideBeam Hybrid RGB/W LED Strips offer brighter, truer whites, making them a superior lighting solution.

Combining two different LEDs onto a single strip means that they can be conveniently controlled with a single remote. The 40-key remote control and receiver can be used to independently control both the RGB and white LEDs, and the RF technology means that direct line of sight is not required for operation. What's more, these LED strips are compatible with GIGABYTE® RGB Fusion Technology, so you can sync up your system's color scheme right out of the box.

To adhere to a wide range of surfaces, CableMod WideBeam Hybrid LED Strips also come with two different adhesives. Strong rare-earth magnets embedded underneath the waterproof coating allow these strips to adhere effortlessly to magnetic surfaces like steel PC cases, and for cases that are non-magnetic, a super-strong 3M adhesive is also included.

Also included in the package are a number of useful accessories, such as a Y-cable that enables you to more conveniently place your Hybrid LED strips to different areas inside your PC chassis. A small extension cable is included to help you connect multiple strips around corners, and the power cable even uses a SATA connector for trouble-free installation.

Specifications

Here's what you get inside the package:

- 1 x WideBeam Hybrid LED Strip
- 1 x RF Remote Control
- 1 x RF Receiver
- 1 x Y Cable (50cm)
- 1 x SATA Power Cable (15cm)
- 1 x 5-pin Extension Cable (5cm)
- 4 x 5-pin Connectors
- 1 x Instruction Booklet

Additional Information

Brand	CableMod
SKU	CM-LED-60-D60RGBW-RK
Weight	0.3000
Lighting Type	Flexible LED Strip
Length	60cm
LED Color	RGBW
Special Price	\$19.97
