

ae CPU Liquid metal thermal pad 40x40mm

\$24.95

Product Images

Short Description

This liquid metal thermal pad features high thermal conductivity and excellent heat transfer. In addition, it has been insulated against electric conduction of liquid metals to ensure long-term operational safety and stability of CPUs

Description

This liquid metal thermal pad features high thermal conductivity and excellent heat transfer. In addition, it has been insulated against electric conduction of liquid metals to ensure long-term operational safety and

Specifications

- Size: 40x40mm
- Thermal conductivity: 80W/M K
- Resistivity: 0.9×10^{-7} ohm M
- Specific gravity: 5.2 g/ml
- Volatilization rate: <0.001%
- Use temperature: -40 degrees Celsius - 500 degrees Celsius
- Corrosion: aluminum corrosion
- Other features: high thermal conductivity, excellent heat transfer performance.
- Aiming at the problem of liquid metal conduction, the insulation of heat conduction plate is processed.
- CPU long term safe temperature operation can be guaranteed.

Additional Information

Brand	AE
SKU	AE-VRY-TP-II
Weight	0.1000
Color	Silver
TIM Type	Pad
