Short Description

The HEATKILLER® IV PRO for Threadripper™ is a premium water block specifically designed for AMD® Threadripper™ processors. It's based on the multiple award-winning HEATKILLER® IV CPU water block series.

Description

The HEATKILLER® IV PRO for Threadripper™ is a premium water block specifically designed for AMD® Threadripper™ processors. It's based on the multiple award-winning HEATKILLER® IV CPU water block series.

The main feature of the block is the completely new cooling structure that is perfectly adjusted to the specific Threadripper™ package. Instead of simply extending the cold plate, we developed a completely new and unique water block. For example, the cooling structure is more than 80% larger than that of a regular HEATKILLER® IV PRO. Flow and bleeding characteristics were also optimized. All these features let the HEATKILLER® IV PRO for Threadripper™ block become a true performance monster!

Mounting the block is extremely simple due to the revamped easy-mount-system. It comes with a defined stop, which guarantees perfect and even pressure over the whole IHS.

The HEATKILLER® IV is a product "made in Germany", manufactured on state-of-the-art CNC machines at the Watercool headquarters.

Specifications

Specifications::

Material Top: Copper

Material cold plate: Copper

Material EasyMountSystem: Nickel plated brass

Measurements (L x B x H): 118 x 78 x 18mm

Weight: approx 900g

Gaskets: NBR 70

Ports: 2x G ¼ inch (DIN ISO 228-1)

Distance between ports: 25 mm

Compatible with: socket TR4 (AMD® Ryzen™ Threadripper™), Socket SP3r2 (AMD® EPYC™)

Scope of delivery:

HEATKILLER® IV PRO for Threadripper™ PURE COPPER

Mounting material

Manual

Additional Information

Brand	Watercool
SKU	WC-18025
Weight	2.5000
Color	Copper
CPU Series	SP3 and TR4
Block CPU Type	AMD
Block Style	Copper
