\$19.95

## Product Images

## Short Description

---

Moderately Fast-Setting Solvent Cement for Bonding Acrylic. WELD-ON 4 is a water-thin, somewhat flammable cement formulated to quickly develop very clear and high strength bonds for many thermoplastic substrates.

## Description

---

Moderately Fast-Setting Solvent Cement for Bonding Acrylic. WELD-ON 4 is a water-thin, somewhat flammable cement formulated to quickly develop very clear and high strength bonds for many thermoplastic substrates. The bond is achieved by first softening the surfaces to be joined and then fusing them together with the dissipation of the solvent. The initial bond forms within a matter of minutes and is followed by a significant and continual increase in bond strength over the next several hours. WELD-ON 4 may be preferred by some plastic fabricators because it is less likely to leave white marks.

**NOTE: This Item can not be shipped internationally. Domestic orders will be shipped via ground Any international order with this item on it will have this product refunded and the rest of the order shipped with out notice.**

## Additional Information

---

Brand	PPCS
SKU	PPCS-39446
Weight	0.5000
Color	Clear
Tool Type	Acrylic Cement
