Short Description

Thermaltake is thrilled to show the latest TT Premium product line – the Level 20 Series which commemorates 20 years of dedication to the PC industry. The Level 20 VT is the pocket rocket of the Level 20 series, offering massive support inside an M-ATX footprint.

Description

Thermaltake is thrilled to show the latest TT Premium product line – the Level 20 Series which commemorates 20 years of dedication to the PC industry. The Level 20 VT is the pocket rocket of the Level 20 series, offering massive support inside an M-ATX footprint.

The Level 20 VT is designed to prove that micro cases don't have to be small on power. It boasts a 200mm fan preinstalled at the front as well as great liquid cooling support, four 4mm tempered glass panels and interchangeable panels with filters. The VT also has a chamber design with a flat motherboard tray that lets you hide away cables, while showing off liquid cooling hardware at the top.

The Level 20 VT takes our latest case innovations and wraps them in an ultra-modern, space-conscious style that's utterly unique in the case market today.

Features

TT Premium

To continue achieving the corporate mission of delivering the perfect user experience, Thermaltake developed "TT Premium" with the essence of combining supreme quality products with a new logo design. TT Premium is far more than just a guarantee of quality. Behind the name, it represents the passion in DIY, Modding and Thermaltake's desire to be the most innovative brand in the PC hardware market. To satisfy the demand of the high-end PC users, TT Premium follows its core values of Excellent Quality, Unique Design, Diverse Combinations and Boundless Creativity to provide a high performance PC product for every enthusiast.

Tt LCS Certified

Tt LCS Certified is a Thermaltake exclusive certification applied to only products that pass the design and hardcore enthusiasts standards that a true LCS chassis should be held to. The Tt LCS certification was created so that we at Thermaltake can designate to all power users which chassis have been tested to be best compatible with extreme liquid cooling configurations to ensure you get the best performance from the best features and fitment.

Big Possibilities, Small Footprint

The Level 20 VT is all about big things coming in small packages. The VT supports M-ATX motherboards, as well as CPU coolers up to 185mm in height, VGA lengths up to 350mm and PSU sizes up to 200mm in length. It also supports up to two 240mm radiators side-by-side in the top panel, or one 280mm at the top or along the side. Meaning you can fit plenty of top-end hardware in this little case.

Chamber Design

The Level 20 VT is optimized for space management. It's divided into two main chambers: the upper chamber is made to house the motherboard and PCI-E components, while the lower one is made for the PSU and drive

bays. Thanks to the removable 2.5"/3.5" drive device racks, there is plenty of flexibility to fit larger components or build a custom liquid cooling loop.

Four 4mm Tempered Glass Panels

The front, top and side panels are all built from our ultra-durable 4mm tempered glass. This means the panels are more resistant to dust and scratches than acrylic and provide a clearer view of internal components.

Advanced Ventilation

The Level 20 VT comes preinstalled with one 200mm front fan and boasts space for up to two front 140mm fans, one 140mm rear fan and two 140mm fans on the top. If you're building a liquid cooling system, it can also handle 280mm, 240mm, 140mm and 120mm radiators. Intake areas are also protected by removable dust filters, installed in the front, top and bottom of the case to shield your hardware from particles in the air.

Speedy Transmission

The side I/O ports features two USB 3.0 and two USB 2.0 to grant users easy access for speedy transmission.

Specifications

Model	Level 20 VT
P/N	CA-1L2-00S1WN-00
Case Type	Micro Case
Dimension (H x W x D)	348 x 330 x 430 mm (13.7 x 13 x 16.9 inch)
Net Weight	8.66 kg / 19.09 lb
Side Panel	4mm Tempered Glass x 4(Left & Right & Front & Top)
Color	Exterior & Interior : Black
Material	SPCC
Cooling System	Front (intake) : 200 x 200 x 30 mm fan (800rpm, 13dBA)
Drive Bays -Accessible -Hidden	3.5" or 2.5" x 3 , 2.5" x 3

Expansion Slots	5
Motherboards	6.7" x 6.7" (Mini ITX) , 9.6" x 9.6" (Micro ATX)
I/O Port	USB 3.0 x 2,USB 2.0 x 2, HD Audio x 1
PSU	Standard PS2 PSU (optional)
Fan Support	Front: 2 x 120mm, 2 x 140mm, 1 x 200mm Top: 4 x 120mm, 2 x 140mm Rear: 1 x 120mm, 1 x 140mm Bottom: 2 x 120mm
Radiator Support	Front: 1 x 240mm, 1 x 140mm, 1 x 180mm(200mm series) Top: 2 x 240mm, 1 x 280mm, 1 x 180mm(200mm series) Rear: 1 x 120mm
Clearance	CPU cooler height limitation: 185mm VGA length limitation: 350mm PSU length limitation: 200mm (With Bottom Fan)
